SOFTWARE ENGINEER

Self-motivated Full Stack Web Developer with a background in creative writing. Recognized as a proactive, resourceful, highly adaptable and management-oriented team player who won't rest easily until the job is done. Have been a member of multiple, small teams working with different frameworks and programming languages.

KEY SKILLS

Software Development Lifecycle (SDLC) | Project Management (Agile/Scrum) | Cross-Functional Collaboration
JavaScript | Typescript | MySQL | Node.js | Server-Side/Third-Party APIs | Object Oriented Programming
React | Angular | Ember

PROFESSIONAL EXPERIENCE

Yahoo!

August 2022 - March 2025

Software Development Engineer (Remote)

Worked full-time on UI development for Yahoo's Store and DSP platforms.

- Became proficient in Angular and Ember frameworks.
- Worked with a six-person scrum to integrate Yahoo Store Angular application into the Yahoo DSP Ember application to meet a tight deadline.

Games.com, New York, NY

June 2012 - August 2012

Summer Intern

- Aided in rebuilding site for relaunch, including writing site descriptions, editing images, creating blog posts.

PROJECTS

Trail Talk

- GitHub Repository: <https://github.com/trm621/national-park-social-app>
- Deployed Site: <https://pacific-shelf-58337.herokuapp.com/>
- A full MERN stack social media application on which users can create an account, create text posts, and add other users as friends. The goal of the site is to get in touch with people around the world to discuss their favorite national parks and give suggestions as to where park lovers might want to make their next trip.
- Worked on front end and back end along with designing the look of the app.
- MERN Stack: React front End, MongoDB database and Node.js/ Express.js server and API
- Built with HTML / CSS / JS

Binge Buddy

- GitHub Repository: <https://github.com/trm621/movie-night-generator>.
- Deployed Site: <https://trm621.github.io/movie-night-generator/>.
 - An application built for the purpose of randomly selecting a dinner and movie pairing for movie night, date night, or a party. Just tell Binge Buddy what kind of movie and food you're in the mood for and it'll take it from there.
- Built JavaScript functionality and implemented the Tasty API into the code.
- Utilizes the third-party Tasty and IMDB APIs.
- Built with HTML / CSS / JS.

Readme Generator

- GitHub Repository: <https://github.com/trm621/readme-buddy>.
 - A Node application in which a user can input information through the command line to generate a professional ReadMe file for their project.
- Utilizes Node and the Inquirer package to run through the command line.
- Built with JS.

EDUCATION

Certificate of Training as Full-Stack Web Developer

September 2021 - March 2022

University of Connecticut School of Engineering, Coding Bootcamp, Storrs, CT

Bachelor's in Writing, Minor in English

September 2011 - May 2015
